MATVEY BOUHARTSEV

Developer

ABOUT ME

Hello! My name is Matvey, I am a developer and a moviemaker. I have experience in web and software development in more than 10 different languages.

I became involved in this work in the 7th grade, when I wrote my first program. Since then, the hobby has grown into a profession. I also like to share my knowledge: I run a YouTube channel where I talk about programming.

WORK EXPERINCE

WEB DEVELOPER

Freelancer   10 Feb 2019 - Current

The web is becoming Increasingly more popular in the IT area. It unites everything from the gaming industry to mobile applications. As a web developer, I have personally experienced the fast-paced evolution of this field, having tried out different languages, frameworks and libraries in my projects.

.NET DEVELOPER

Freelancer   3 Feb 2019 - Current

Windows is the market leader in operating systems. This user oriented operating system allows you to write easy-to-use and attractive programs. As a .NET-developer, I have written several helpful utilities for Windows with a user-friendly interface. I wrote them for my personal use, but later I made them available to people around the world.

C++ DEVELOPER

Freelancer   1 Oct 2018 - Current

As a student of the Moscow School of Programmers, I decided to connect my life with programming. I believe that C++ has the perfect potential for development speed, convenience and efficiency.

EDUCATION

HONOURS DEGREE

School of Self-Determination   1 Sep 2009 - 19 July 2020

I graduated from the school №734 with the highest possible grades, a red diploma and two gold medals. During the education process I tried to expand my knowledge in various academic fields. I participated in olympiads and school-wide events, which allowed me to improve my hard and soft skills.

BACHELOR OF ENGINEERING

Moscow Polytechnic University   1 Sep 2020 - Current

Currently I am studying at the Moscow Polytech, at the Faculty of Information Technologies, majoring in Computer Science and Computer Engineering (Web Technologies program). My desire for self-development also helped here: the grade point average, based on the exams, is 4.7 out of 5.
